

WHAT THE MASTER PLAN OFFERS

This master plan is divided into four phases of development that would be complete by 2024, though planners say the first three phases, to be concluded by 2017, are more specific than the more speculative final chapter.

Other key components:

- * At least two new parking decks.
- * A new student union and the demolition of the current facility.
- * A new library and the renovation of the current library.
- * Several new commons areas aimed at encouraging students to gather.
- * A new convocation center on Fayetteville Street.
